2 Module Description

Community and collaborative media have a global significance, being promoted in many parts of the world as a development platform for the enhancement and building of personal, social and civic literacies and skills. At the same time community media also champions dialogue and understanding within and between grassroots and marginalised communities.

As a third-tier of media, distinct from commercial or state-sponsored public media, community media organisations operate from a range of positions, including ad-hoc non-governmental, and anti-corporate forms of representation, organisation and accountability. Community media consequently faces a number of challenges in achieving short-term operational functionality while seeking longer-term sustainability.

This module will critically examine the national and trans-national policy discourse of international community media development, and will give learners the opportunity to explore, within an international context, how the management and organisational structures within community media can be used to promote responsive social gain objectives of collaborative, grassroots and networked community media volunteers and participants.

Theme 1: Community Media Partnerships

Working with the third-sector, regional and local authorities, education providers, professional bodies, regulators and altruistic trusts. Networking with activist, faith and community interest groups. Challenging stereotypes & barriers between organisations, communities & people(s).

Theme 2: Community Media Volunteering & Participation

Hearing all voices; managing for volunteering and participation; project management for voluntary groups; recognising and rewarding volunteers; hosting & moderating discussion; managing realistic expectations; building capabilities and literacies.

Theme 3: Community Media Funding & Development

Making partnerships work; forms of organisation - cooperatives members associations; sources of main-stream & alternative income; applying for funding awards; ITC infrastructure development; financial management & accountability; community regeneration.

Theme 4: Community Media Global Perspectives

International networks of community media practice, research & public policy; international development goals & bodies; development challenges - planning for capabilities & literacies skills development; intra- & extra-community communication; case-studies of supporting organisations - i.e. Media Trust, Unesco, European Community, BBC World Service Trust, etc.

3 Key Words

Community, social impact, convergence, participation, collaboration, attention, critical consumption, social media, community development, DIY-Media, Web 2.0, technology, media, culture, mediation, media technology, new media, digital literacies.

4 Social Learning

If you wish to share and discuss issues related to the topics covered in the module please use the hashtag **#diydmu**.

In this module emphasis will be placed on collaboration, sharing, discussion and participation. The idea is that learning is enhanced if it is shared and collectively developed. Each person has a responsibility to play their part in the activities and the tasks, and to encourage and support other learners as the module unfolds.

This year we are introducing a new online discussion forum as part of the DMU Commons, which we will be exploring and learning how to use. As this system is new it will give us the opportunity to find out how it can be best used to support learning and discussion across the university
<https://talk.our.dmu.ac.uk>.

As a community of learners and practitioners this approach recognises that there is more to be gained from a non-hierarchical approach and by spreading-out the tasks using social media tools that encourage everyone to participate and to share their ideas, thoughts and observations in a constructive, non-judgemental, and practical way.

4.1 Face-to-Face Interaction

While the subject of this module is community media, the primary approach of the learning activities will be based on face-to-face interaction. This takes places in lectures, labs and arranged tutorials. A typical workshop session will consist of a short introduction presentation, the distribution of instructions via the tutor's blog site, and then short discussions with individuals and small groups throughout the remainder of the session. This takes an informal approach to interaction between the learner and the tutor.

4.2 Verbal Instructions

While many of the tasks and coursework assignments are specified in detail in this handbook, learners are encouraged to listen to the verbal instructions of the tutor, and to ask questions based on the notes that they take.

Any questions that relate to the practical work, the reading work, or the assignments associated with this module should be noted by learners and asked during the practical sessions. This is why attendance is essential, and why good listening skills and a distraction-free environment are important.

The assignments described here are starting points and are not prescriptive. Learners are encouraged to go-beyond the tasks and activities that are set here, and to investigate for themselves different ways that social media might be used.

4.3 Note Taking

Lecture notes and lab worksheets will be provided as PDF documents, with any essential information, links, diagrams, references and source material. However, learners are expected to keep notes for themselves, and to record information that is not given in the handouts.

Note taking is an essential skill so it is important to develop the habit and routine practice of writing notes, sketching diagrams, doodling and so on. You never know when these notes might be useful.

5 Attendance

A register will be kept of attendance at labs and attendance will be monitored. Non-attendance without good reason can often lead to failure of the module.

If you are ill or are away from the university due to an unavoidable or urgent matter please email FOTAC fotadvicecentre@dmu.ac.uk who will inform your tutors, who will mark you as absent. The university may require you to provide evidence to corroborate your absence at some point in the future.

6 Reading

It is expected that learners will read all of the material from the essential reading list, to broaden and deepen understanding of the subject beyond the basic ideas about community media, and thus enhance performance in assessments. Students do not need to read all items on the recommended list; since many items listed may be alternative sources covering the same subject matter. In addition to the learning materials that are made available on the module wiki page, learning resources will also be listed on the DMU Library resource list <http://libguides.library.dmu.ac.uk/ResourceLists>

6.1 Essential Reading

Croucher, S.M. (ed.) (2017) *Global Perspectives on Intercultural Communication*, London, Routledge.

Lennie, J. & Tacchi, J. (2013) *Evaluating Communication for Development*, London, Routledge.

Monbiot, G. (2016) *How Did We Get into This Mess?* Verso, London.

Philips, R. & Pittman, R.H. (eds.) (2015) *An Introduction to Community Development*, 2nd Edition, Routledge, London.

6.2 Study Skills

Cottrell, S., & Morris, N. (2012). *Study Skills Connected - Using Technology to Support Your Studies*. London: Palgrave Macmillan.

McMillan, K. & Weyers, J. (2012) *How to Improve Your Critical Thinking & Reflective Skills (Smarter Study Skills)*, Harlow, Pearson.

6.3 Recommended Reading

Atton, C. (2002). *Alternative Media*. London: Sage.

Brunsma, D.L. (et al) (Eds.) (2017) *Movements For Human Rights*. London, Routledge.

Craig, G. (et al) (2011). *The Community Development Reader*. Bristol, Policy Press.

Derber, C. (2017). *Welcome to the Revolution - Universalising Resistance*. London, Routledge.

Gilchrist, A. & Taylor, M. (2011). *The Short Guide to Community Development (2nd ed.)*. Bristol, Policy Press.

Howley, K. (2005). *Community Media - People, Places and Communication Technologies*. Cambridge: Cambridge University Press.

Manyozo, L. (2017) *Communicating Development with Communities*, London, Routledge.

Philips, R. & Pittman, R.H. (eds) (2015) *An Introduction to Community Development*, 2nd Edition, Routledge, London.

Putnam, R. D. (2000). *Bowling Alone - The Collapse and Revival of American Community*. New York: Simon & Schuster.

Rennie, E. (2006). *Community Media - A Global Introduction*. Oxford: Rowman & Littlefield.

Wicked Problems Collaborative (2016). *What Do We do About Inequality?* WPCLLC

7 Study Hours

7.1 Lecture: One Hour

The lecture will consist of an examination of ideas and concepts associated with the use and development of community media platforms and practices. The lectures run for no more than fifty minutes, and will start promptly on the hour and finish at ten minutes to the hour.

Media examples will be given, along with suggested reading and links to other media. It is expected that learners take notes during the lecture to supplement any notes that are made available by the lecturer. Learners are expected to adhere to the norms of academic practice during lectures, and not disturb or distract other students.

7.2 Workshop: Two Hours

Workshops will take the form of a practical session in which you will actively explore and produce content for your blog, experimenting with different types of community media, and applying problem solving and creative thinking techniques in order to get the best from them.

The workshop will cover:

- Discussions of issues covered in lectures.
- Experimenting with different forms of community media.
- Setting up blogs and wiki pages.

- Writing blogs and wiki entries.
- Sharing content and ideas.
- Reflecting on feedback.
- Planning for future work.
- Sharing media content.

The workshop will take the form of a mixed session that will use different learning techniques and blended learning practices. Short-bursts of lecture-style presentations will be intermixed with discussions, online searches, practical production and project work. Some sessions will take place in different locations and away from the campus.

7.3 Personal Study: Eight Hours

As well as attending your classes you are expected to spend time each week working on coursework, background reading, independent investigation, group work and getting to know different social media platforms. Typically, this might be divided into:

01	Weekly blog planning & writing	Two Hour
02	Weekly wiki planning & writing	One Hour
03	Media investigation	One Hour
04	Group Work	One Hour
05	Academic Reading	Three Hours
	Total Minimum Study Time	Eight Hours

7.4 Tutor Contact

Your tutors will **not** answer queries and questions about coursework, the lectures or the workshops by email or any other forms of electronic communication.

Instead, you are expected to **make a note** of your questions in your notebook and bring them to your weekly lab session, where time will always be given to answer any **ESSENTIAL** questions that you have.

Your tutor has allocated time each week to see students for personal tutorials if required. These are listed at the front of this handbook, on your tutor's wiki profile, and on the door of your tutor's office.

8 Wiki: Module Information, Lecture & Workshop Notes

Information about the module assessment criteria, the submission instructions and dates, plus and notes, links, and recommendations from each of the lectures and the workshops will be posted to: https://wiki.our.dmu.ac.uk/w/index.php/TECH2503_Community_Media_Production

Additional media files and messages will be sent from Blackboard <https://vle.dmu.ac.uk>

9 Enhancement Weeks

Your programme team are committed to support you through your studies and as you develop your learning through each module that you study. As part of your programme, we are dedicated to helping you to plan for your future after leaving university, and 'Enhancement weeks' are a central concept to

help you achieve your future goal. As part of the university calendar, week 6 and week 22 are designated 'Enhancement weeks' in which you will find timetabled activities focused around your personal and professional development. Enhancement weeks are not simply about getting a job after you graduate, but a method used within career education comprising activities to support your development in areas such as decision making, employment opportunity awareness, the transition to work and self-awareness skills.

As well as activities organised at the university, there are other events taking place in Leicester that you can participate in.

Doc Media Month is a series of events that discusses and shares the culture of documentary films. The events take place through November <https://docmediacentre.wordpress.com/doc-media-month/>

10 Learning Outcomes

At the end of this module you will be able to demonstrate:

1	An awareness and knowledge of the underlying concepts associated with community media development.
2	An ability to interpret and evaluate terms and concepts associated with community media development.
3	An ability to present data and evidence about community media development principles and practices and to interpret that evidence using academic concepts.
4	An ability to produce media content (images, sound, text) using media production technologies which can then be distributed using broadcast, social or interactive community media.
5	An ability to evaluate different problem-solving approaches related to community media production techniques and the media used by participants in community media networks.
6	An ability to relay information and communicate observations and findings from investigation into community media development and production practices.
7	An ability to try new learning practices and ideas, and to develop new skills for reflexive and self-evaluative learning.
8	An ability to manage and organise individual and group projects and to exercise personal responsibility in the completion of individual and group tasks and objectives.

12 Assessment

Coursework Portfolio: 50% (formative, three components)

Academic Report: 50% (3,000 words, summative & formative)

Portfolio: The coursework portfolio will comprise a range of media content in the form of reports, features, interviews and articles produced by learners using different examples of social media (such as podcasts, blogs, online video, micro-blogs, social media networks), broadcast media (such as contributions to community radio and television programmes), printed media (such as newspapers and magazine articles, photography and graphic designed images), digital learning badges, wiki articles, online forum discussions, presentations and formally delivered academic papers.

Report: The report will provide a systematic and reflexive assessment of the students' academic experience as a community media developer and content producer. Evaluating the primary content delivered in the lectures, this report will evaluate and synthesise key texts, reports and statements with secondary published texts about the status and value of community media services that are published online and through broadcast or printed sources.

13 Plagiarism

Plagiarism is one of the academic offences that the University takes very seriously and the penalty could be expulsion from the University.

13.1 Definitions of Plagiarism

The regulations define plagiarism as 'the significant use of other people's work and the submission of it as though it were one's own' in assessed coursework. This includes:

- Copying from another student's work
- Copying from a text without acknowledgement
- Downloading information and/or text from the Internet and using it without acknowledgement
- Paraphrasing source material without acknowledgement
- Submitting work that you claim to be your own when a group has produced it
- Submitting group work without acknowledging all contributors

13.2 Penalties

A number of penalties may be imposed depending on the seriousness of the offence and evidence in mitigation: Expulsion from the University with failed assessments during the academic session
Failure of all assessments in the semester. Failure of the module to which the offence relates.

The DMU Library offers advice about academic skills which can be accessed online:

<http://www.library.dmu.ac.uk/Support/Guides/index.php?page=499>

Further information about the academic practice policies of the university can be accessed online:

<http://www.dmu.ac.uk/dmu-students/the-student-gateway/academic-support-office/academic-offences.aspx>

14 Anonymous Marking

The University has introduced the requirement to anonymously mark all assessment work. However, it recognises that, for some forms of assessment, anonymous marking is neither possible nor appropriate.

Following prior consultation between students and staff, it has been agreed that coursework assessment for this module will not be marked anonymously as:

1. It comprises individually distinct practical work characterised by lab teaching, where your tutors will work closely with you to develop your work for submission. This submission cannot be marked anonymously as the work will be individually identifiable by your assessing tutor.
2. It comprises individual or group work which is presented to, or observed by, the assessing tutor. This work cannot be marked anonymously as the work will be individually identifiable by your assessing tutor.
3. It comprises individual or group work which is presented to, or observed by, your peers. This work cannot be marked anonymously as the work will be individually identifiable by your assessing tutor.
4. It comprises work individually negotiated and prescribed by your tutor and where there may be individual interaction with the tutor to acquire formative feedback. This work cannot be marked anonymously as the work will be individually identifiable by your assessing tutor.
5. It comprises practical work where the creator of the work features in the assessment. This work cannot be marked anonymously as you will be individually identifiable by your assessing tutor.

15 Key Module Competencies

15.1 Subject Knowledge:

Know, understand and apply knowledge, be able to analyse and synthesise knowledge, and critically evaluate about community media development practices, principles and processes.

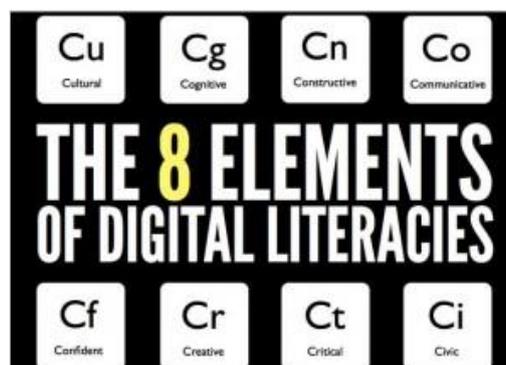

Academic skills: basic knowledge and comprehension of information search, management, using secondary sources, referencing, written presentation standards

15.2 Digital Literacy and Self-Reflection:

Knowing, understanding and applying technology for study and online literacy for production, participation and collaboration, demonstrate ability to evaluate and reflect on own use of technology for study skills and production and the wider context of being online.

15.3 Essential Digital Literacy Skills

Doug Belshaw has identified eight important skills that you will be asked to think about and demonstrate that you have some capability in using and working in social media:

Cu - CULTURAL: Developing my cultural component of digital literacy means that I am able to move easily between different digital environments and use learning technologies in a variety of different contexts. For example I know how to distinguish between using Facebook for my personal and social connections, and using it for my academic course. I am also aware of the norms, values and codes that are specific to my subject and how these might impact on my use of learning technologies.

Cg - COGNITIVE: I need to master the 'how-to's of specific tools and technologies that are important for my development as a graduate, including those which are subject-specific as well as more general tools that will make me a more digitally literate person. I will develop my cognitive element by engaging with a wide range of operating systems, platforms, devices and software and looking for developmental and training opportunities that expose me to these tools.

Cn - CONSTRUCTIVE: To develop the Constructive element I need to understand and demonstrate how to take existing resources and content and re-use/remix it to create something new that benefits my learning. I also need to show awareness of the different ways I can license resources so that others can benefit from the content that I create.

Co - COMMUNICATIVE: I need to understand the importance of networks and communication and the important role they play in developing my digital literacy. This includes understanding the many different ways I can communicate with different devices, including mobile and other digital devices. I also need to develop an understanding of the particular norms, values, protocols and ethics that are appropriate to social networking and other web 2.0 technologies.

Cf - CONFIDENT: To be a confident user of digital technologies I need to understand and capitalise upon the differences between the analogue and digital worlds. I need to assess and review my own competence with digital technologies, manage my own digital personal learning environment, and develop a community of practice to help me progress my skills and attributes.

Cr - CREATIVE: To develop my Creative element I will use digital technologies to create new things which have value to myself and others. I need to be prepared to take risks and to value randomness and discovery when engaging with digital technologies. I will develop an understanding of the processes, procedures and systems that lie behind digital technologies rather than the specific elements of software/hardware involved.

Ct - CRITICAL: I need to be a critical user of digital technologies by becoming aware of the power structures and assumptions behind different digital tools and practices. For example I need to think about my audience and how they might interpret my digital texts in different ways. I also need to develop an understanding of online security, identity and data management in my own literacy practices.

Ci - CIVIC: I need to make use of digital technologies in order to prepare myself to participate as fully as possible in society. I will develop an awareness of how my digital environment can help me self-organise and foster links with local, national and global organisations. I will look for opportunities for public engagement, global citizenship and the enhancement of democracy through my use of digital technologies. <http://digilitpride.wordpress.com/2012/10/01/making-sense-of-the-8-elements-of-digital-literacy/>

16 Assessment Outline

16.1 Component A - Survey of International Community Media Projects (5%)

16.1.1 Coursework Brief

Internationally, community media is often managed as part of a specific social or civic development project that seeks to achieve defined ends, such as addressing voice poverty, aiding economic development, improving civic and social literacies and skills, enhanced participation in communities, local politics and media. International development and aid organisations have specific aims to support and enhance a wide range of marginalised communities by offering training in media so that these communities can represent themselves, both in the media debates that take place, and in the practical skills that make these communities sustainable.

This assignment is a test of your ability to investigate and research different approaches to international community media development, the purposes that they are established for, the social-gain objectives they seek to achieve, the social needs they seek to meet, the activities that they include, and the people that they are based around.

The result of your survey of different types of community media development projects will be presented as a short video presentation, lasting no longer than five minutes, with a short description included as part of a shared DMU Commons Wiki page about international community media projects. https://wiki.our.dmu.ac.uk/w/index.php/International_Community_Media_Projects

Each student will identify a different example of an international community media project as run by a different development organisation, and will write about how that project works, what is involved, and what it is expected to achieve, before summarising this description in a short video presentation. The presentation can use creative media techniques, but will be uploaded to your DMU Commons Blog, either as a directly uploaded video, or as an embedded YouTube video.

16.1.2 Assignment Requirements

Using the International Community Media Projects page on the DMU Commons Wiki, you will each identify a separate example of international community media projects, looking for articles, interviews, papers, social media posts, videos, and online discussions that illustrate how each of these projects operate. https://wiki.our.dmu.ac.uk/w/index.php/International_Community_Media_Projects.

You will write a short description on the International Community Media Projects wiki page, identifying which project you are focussing on, with your name clearly identified as the author of this section. You can discuss the development of the International Community Media Projects page by using the 'discussion' tab on the wiki page, or by using the DMU Commons Discussion Forum <https://talk.our.dmu.ac.uk>.

Once you have investigated and summarised your research, you will then make a short video presentation that explains what the community media project you investigated is about. This video should last no longer than five minutes and should include images, screen grabs, and other forms of media you think is appropriate. You must record a voiceover narration. Any video without a narration will automatically be marked at 0%.

You will post your video to your DMU Commons Blog <https://our.dmu.ac.uk>, using the category DIY-DMU so that it can be shared on the DIY-DMU site <https://diy.our.dmu.ac.uk>.

A link to your blog post containing the video presentation, with a short description of what is notable about it should be added to your DMU Commons Wiki Personal Profile page.

https://wiki.our.dmu.ac.uk/w/index.php/TECH3501_Learners

Minimum Work: DMU Commons wiki page section, blog and five-minute video presentation.

Deadline: 10am Monday 6th November 2017

Submission: Individual links clearly marked on your DMU Commons Wiki Profile.

https://wiki.our.dmu.ac.uk/w/index.php/TECH3501_Learners

Marking & Feedback: 10am Monday 4th December 2017

16.1.3 Assessment Criteria & Feedback

Feedback and marking for this assignment is based on this traffic-light grid, which you can use to check-off that you have completed each of the components. A brief comment will be included by your module tutor, and verbal feedback will be given in the workshops.

16.2 Component B - Planning International Community Media Day (15%)

16.2.1 Coursework Brief:

International community media is often characterised by development projects that seek to deal with significant social problems, such as disaster recovery, skills and literacy development, civic awareness raising, conflict resolution, economic development and intercultural communication, to name only some. For this assignment, you will investigate a topic of **social concern** that is associated with international community development that you want to address using community media engagement techniques, which will be developed and implemented in the next assignment. You will identify what events, activities and information you might include in a set of community media development sessions and events that will highlight and raise these topics of concern.

A **DMU Global Trip to Cambodia** is being organised as part of this module, and can be used as the basis for this assignment. However, it is not compulsory to attend this trip, and so the assignment can be completed with some adaptation of the projects while still meeting the objectives. This can be discussed with your module tutor https://wiki.our.dmu.ac.uk/w/index.php/DMU_Global_Cambodia.

An exhibition of your work will take place on **Wednesday 9th May between 10am and 4pm**. This International Community Media Day Expo, will consist of posters from each learner that illustrate the activities and events that have taken place as part of this module. Creative design work is encouraged. Learners from TECH1502 and TECH2503 will also be exhibiting their work under your guidance. https://wiki.our.dmu.ac.uk/w/index.php/International_Community_Media_Expo

This assignment consists of investigation and research into your chosen social topic for component C of your coursework, as well as the practical planning that you need to undertake in order to run a community media development project successfully. This means discussing ideas with members of your group, finding out if other people have undertaken similar community development projects, and explaining how these projects work.

You will then write about and explain your planning using the Community Media Projects page on the DMU Commons Wiki https://wiki.our.dmu.ac.uk/w/index.php/International_Community_Media_Projects. This should be linked and integrated with the DMU Global Cambodia trip page. A new system is being introduced this year that will help to organise contacts and schedule mailshots and other forms of electronic communication <https://civic.our.dmu.ac.uk>.

You can discuss your plans using the discussion tab of the Community Media Projects page on the DMU Commons Wiki, or you can use the new DMU Commons discussion forum <https://talk.our.dmu.ac.uk>.

16.2.2 Assignment Requirements

For this assignment, you will research and write about a relevant community development issue, as they are discussed and talked about in newspaper articles, in blog sites, in chat rooms, and so on, as they relate to international community development. But particularly you will look at different types of community media development projects and how they have been used to tackle some of these issues. Your blogs will summarise the key issues of concern, and will use quotes, links and screengrabs to demonstrate what is being discussed in these articles and threads.

The final blog post of this section of your coursework portfolio should be a **three-minute reflective video**, posted either to the blog directly, or embedded into your blog as a YouTube video. This vlog will give a basic overview of what you discovered in your investigation and in what way your group will take this information and use it in the next assignment, and turn this into a practical project.

You should aim to incorporate a wide variety of content such as podcasts, videos, blogs and wikis, or whatever forms of media you are asked to experiment with and try out. We want to experiment with creativity and innovation, so your media skills will be something you want to show off as you learn new skills and use new platforms.

So, you will submit **five** blog posts, the last blog being a three-minute video blog that reflects on what you have planned for your community media development project sessions. It is essential that you establish the habit of blogging regularly, so you will be expected to post a blog each week, with an updated link on your wiki profile page, and an explanation of what is distinctive and innovative about the blog post. Time will be put aside in the workshop sessions for this.

- You will make a media portfolio consisting of work posted to your blog site on the DMU Commons site <http://our.dmu.ac.uk> and fed into the module blog site <http://diy.our.dmu.ac.uk/> using the DIY-DMU category.
- You will provide a description of the portfolio and any appropriate links to your work on your Wiki Profile Page: https://wiki.our.dmu.ac.uk/w/index.php/TECH3501_Learners
- Your work can consist of any combination of media and use of online tools, services and platforms. The more creative and inventive the type of media you use in your blogs the better.
- All of the production and planning work must be available online and be capable of being linked-to or embedded on your portfolio page in the module wiki.
- You could make a series of photographs, videos, or podcasts, use sites such as Twitter, Paperli, Flipboard, Tumblr, YouTube or Pinterest, for example, alone or in combination.
- The media used in these posts must be made specifically for the module and be driven by the specific aims and objectives of the assignment.

Your blog posts must relate to the research and planning you are undertaking, and the discussions that your group hold about the community media development projects that will be undertaken after the Christmas break, either during the trip to Cambodia or based in Leicester. The portfolio should consist of a significant body of work, showing that you have produced your posts each week, and have actively researched issues that are related to your community media development project topic. Your portfolio will also demonstrate that you are able to establish a regular routine throughout the period demonstrating digital literacies, creativity and production skills.

- Each blog should take no more than two hours to plan, write and post each week.
- Time will be given in the weekly lab sessions for you to write your blog posts.

In order to assess your work, your tutor will visit your DMU Wiki Profile Page and will only follow the links that you provide on the page. If you do not have any links to your individual blogs on your profile page you will be marked at zero.

Minimum Work: Five weekly blog posts, at least one published per week from week 6 to Week 11.

Deadline: Week 12 (1st week of Christmas break), 10am Monday 18th December.

Submission: Individual Links clearly marked on your DMU Commons Wiki Profile.

Marking & Feedback by: 10am 22nd January 2018.

16.2.3 Assessment Criteria & Feedback

	Blogs	Discussion Links	Research	Writing	Media	Wiki Profile
0 – 20%	<ul style="list-style-type: none"> Poorly written. Does not cover the topics given in the brief. Contains obvious errors and poor use of language. No consistency between each blog post. 	<ul style="list-style-type: none"> No links to wider online discussions of the topic. No evidence of discussion in group. Does not cover the specific topic. 	<ul style="list-style-type: none"> No research based on reading or investigation. Makes assumptions based on own opinion. Does not relate to the topics specified. 	<ul style="list-style-type: none"> Poorly written, with significant errors. Informal and colloquial writing. Does not focus on or explain topic. 	<ul style="list-style-type: none"> No embedded or linked media. Media does not work or is of poor quality. Media is not related to topic. 	<ul style="list-style-type: none"> No links to individual blogs. No comment on each of the blogs. Poor formatting and writing.
20 – 40%	<ul style="list-style-type: none"> Poorly written. Basic cover of the topics given in the brief. Contains some errors with poor use of language. Largely inconsistent posts. 	<ul style="list-style-type: none"> Basic links to wider discussions online. Limited evidence of group discussion. Covers the topic but in a limited way. 	<ul style="list-style-type: none"> Limited research that is general in nature and does not specifically relate to the topic. General assumptions are made based on own experience. 	<ul style="list-style-type: none"> Writing is basic but clear. Some errors. Limited use of language and some casual phrases. Gives some focus to the topic and how it is relevant. 	<ul style="list-style-type: none"> Some media is used but it is limited. The quality of the media is inconsistent. The media has some relation to the topic, but it is not clear. 	<ul style="list-style-type: none"> Some links to the blogs but these are not consistent. The comments are limited and basic. The wiki is poorly formatted and the writing is inconsistent.
40 – 60%	<ul style="list-style-type: none"> Clear writing that is logical and makes sense. Covers the topics given in the brief. Contain small number of errors, with competent use of language. Consistent posts. 	<ul style="list-style-type: none"> Links well identified and clearly used in each post. Evidence of discussion of the topic in the group. Range of issues considered relate to the topic consistently. 	<ul style="list-style-type: none"> Research is useful and related to the topic. While there are assumptions from own experience, there is some evidence of research from other discussions and sources. 	<ul style="list-style-type: none"> Writing is clear and presented consistently. Use of language is mature, giving a sense of competence to the reader. The topic is mostly well explained in an engaging and direct manner. 	<ul style="list-style-type: none"> Media is used consistently, relating well to the topic. Quality of the media is consistently produced. The media relates directly to the topic and illustrates issues concisely. 	<ul style="list-style-type: none"> The links are clear and easy to find, follow and access. The description of each blog is clear and relevant. The writing is well structured and explains the content of the blogs consistently.
60 – 80%	<ul style="list-style-type: none"> Engaging writing that is evocative and makes a strong point. Gets to the heart of the topics given in the brief. No obvious errors, with a rich use of language. Consistent posts. 	<ul style="list-style-type: none"> Links to articles and discussion feeds are well chosen and relevant to the topic. Clear evidence of lively and engaged discussion in the group. 	<ul style="list-style-type: none"> Evidence is clear and well related to the topic. There are few or no assumptions being made. Evidence is drawn from distinct examples and situations. 	<ul style="list-style-type: none"> Writing is clear, expressive, consistent. Language is used creatively and presents issues in an engaging manner. Points are made succinctly and encourage further debate. 	<ul style="list-style-type: none"> The media is imaginative and relates specifically to the topic. The media is produced well to a sharable quality level. The media imaginatively relates to the topic and is inventive. 	<ul style="list-style-type: none"> The links are very easy to find and access. The description of each blog identifies something of interest and relevance. The writing engages the reader as an example of good discussion.
80 – 100%	<ul style="list-style-type: none"> Rich and evocative use of language making a direct point. Goes beyond the brief to make a point of value. Rich use of language and no errors. Consistent posts. 	<ul style="list-style-type: none"> Challenging and thought-provoking use of links that move the topic forward. Discussion is well founded, engaging and direct. Issues that are explored are challenging and thought provoking. 	<ul style="list-style-type: none"> Innovative and imaginative use of source material for evidence. No assumptions are made, and each source is interrogated thoroughly. Based on clear and direct examples. 	<ul style="list-style-type: none"> There is a sense of pleasure and playfulness in reading the posts. The language is mature and sophisticated. Issues are engaged with creatively and expressively. 	<ul style="list-style-type: none"> The media is imaginatively presented and produced. The quality of the media is very 'shareable'. Creativity and imagination are clearly expressed in the media. 	<ul style="list-style-type: none"> The links are clear and easy to access. The description of each blog posts identifies its key features and qualities. The writing gives a strong sense of engagement with the topic.

16.3 Component C - Running International Community Media Day (30%)

16.3.1 Coursework Brief

International community development projects increasingly focus on sustainability and the future provision of resources that are managed in the local communities that are affected by issues of economic development, climate change, conflict, globalisation, and so on. Community media development projects are founded on the principle that in supporting local access to media it is possible to embed economic, civic and social development practices beyond that which can be achieved in face-to-face training sessions.

You will develop, plan and run a set of community media development projects that contribute to meeting the social needs of a particular international community. You will use community media engagement and participation techniques to help support and build skills in media production, discussion and distribution, with the aim of promoting understanding, collaboration and shared experiences as a form of intercultural communication. The founding principle, therefore, is that intercultural communication has to be two-way, and must avoid unethical practices of exploitation by seemingly well-intended and well-resourced development organisations.

A DMU Global Trip to Cambodia is being organised as part of this module, and can be used as the basis for this assignment. However, it is not compulsory to attend this trip, and so the assignment can be completed with some adaptation of the project while still meeting the objectives. This can be discussed with the module tutor https://wiki.our.dmu.ac.uk/w/index.php/DMU_Global_Cambodia

An exhibition of your work will take place on **Wednesday 9th May between 10am and 4pm**. This exhibition, will consist of posters from each learner that illustrate the activities and events that have taken place as part of this module. Creative design work is encouraged. Learners from TECH1502 and TECH2503 will also be exhibiting their work under your guidance. https://wiki.our.dmu.ac.uk/w/index.php/International_Community_Media_Expo

16.3.2 Assignment Requirements

Your task in this assignment is to take on the role of a host for an International Community Media exhibition which demonstrates and explains your experience planning, developing and running a set of international community development projects. Your tutor will guide you and help you to develop the skills that you need to do this, and will help you to identify the communities that you will be working with.

You will be undertaking the following tasks:

- Planning, researching, and running an International Community Media Exhibition.
- Researching topics and issues of discussion to include in the exhibition programme.
- Engaging with people and finding out what they want to discuss, then promoting the exhibition to encourage people to attend and participate.
- Writing about topics and issues that are important to the social and civic development of the identified communities who attend the international community development sessions.
- Hosting international community media development events that are accessible and encourage people to get involved, learn something, and feel confident about attending.

You will be expected to organise and write about your work using the DMU Commons resources:

- Using the DMU Commons Wiki as the main platform, you will collaborate, develop, try-out and reflect-on your international community media development topics.

- Your job will be to create and develop an international community media exhibition, and to describe how this will be done on a dedicated page on the DMU Wiki, that will help people to get together and to take part in your allocated activity https://wiki.our.dmu.ac.uk/w/index.php/International_Community_Media_Expo
- You are encouraged to use social media to manage and develop this process, and to include people as participants and co-developers. You can use the 'discussion' tab on the wiki pages, or the new chat forum <https://talk.our.dmu.ac.uk>
- Groups and topics will be allocated by your tutor in your lab sessions. The list of topics, with links to projects undertaken in previous years can be found here: https://wiki.our.dmu.ac.uk/w/index.php/International_Community_Media_Projects
- Time will be allocated in the lab sessions for the investigation and the planning of the topics, so group membership is fixed by your lab session.
- Your project will be based on the research your group has undertaken in coursework B.

Your final International Community Media Exhibition Wiki page will include:

- A definition of what your project is.
- Examples of this type of activity that have been undertaken elsewhere.
- Instructions and essential information about getting started.
- Examples of how your group tried-out different activities.
- Links to video footage, photographs, audio capture, blog write-ups, links to Tweets, Facebook Groups, Google Groups, pages, and so on, that show how the activity was undertaken.
- Comments from participants from beyond the group that have been drawn-in to join the group and participate in the activity.
- You are expected to keep a journal that records your involvement and level of participation through the process of developing your Community Media Group Project.
- Ten entries will be posted to your blog each week and listed on your personal wiki profile page.

16.3.3 Blog Journal

What you will actually be marked on is your blog journal. You are expected to keep a journal that records your involvement and level of participation through the process of developing and putting into practice your International Community Media project.

Entries will be posted to your blog each week and listed on your personal wiki profile page as done in the previous assignment.

The final blog post will consist of a video presentation lasting no longer than three minutes, that reflects on what you have personally learnt about this community media project, how you have improved and developed your creative media skills, and how this relates to the content that you will have posted to your own blog site and the module wiki.

Minimum Work: Ten blog posts published each week 15 to Week 24.

Deadline: Week 32, 10am Thursday 10th May 2018.

Submission: Individual Links clearly marked on DMU Commons Wiki Profile.

Marking & Feedback: Thursday 7th June 2018.

You are being assessed on your ability to:

- Research information about the activity your project is based on.
- Share and collaborate as a group to develop your international community media project.
- Present and manage information to users of your international community media project.
- Reflect on the process of developing your international community media project.
- Keep an individual reflective account of your international community media project.

The media imaginatively relates to the project and is inventive. 	<ul style="list-style-type: none"> The links are very easy to find and access. The description of each blog identifies something of interest and relevance. The writing engages the reader as an example of good practice.
80 – 100%	<ul style="list-style-type: none"> Rich and evocative use of language making direct points. Goes beyond the brief to make a point of wider social or academic value. Rich use of language and no errors. Consistent posts. 	<ul style="list-style-type: none"> Challenging and thought-provoking use of links that move the project forward. Discussion is well founded, engaging and direct. Issues that are explored are challenging and thought provoking. 	<ul style="list-style-type: none"> Innovative and imaginative use of source material for evidence. No assumptions are made, and each source is interrogated thoroughly. Based on clear and direct examples. 	<ul style="list-style-type: none"> There is a sense of pleasure and playfulness in reading the posts. The language is mature and sophisticated. Issues are engaged with creatively and expressively. 	<ul style="list-style-type: none"> The media is imaginatively presented and produced. The quality of the media is very 'shareable'. Creativity and imagination are clearly expressed in the media. 	<ul style="list-style-type: none"> The links are clear and easy to access. The description of each blog posts identifies its key features and qualities. The writing gives a strong sense of engagement with the topic.

16.4 Component D – Community Media Projects Report (50%)

16.4.1 Assignment Overview

This assignment tests your ability to plan, research and write an academic report that answers a specific question of concern related to international community media, and which draws on the academic reading recommended for the module. Therefore, you will:

- Relate your answer to the specific reading material listed as essential or recommended in the module reading list.
- Use evidence gathered from legitimate sources.
- Use academic language and analysis conventions.
- Structure your report according to academic standards and conventions.
- Provide suitable objective and verifiable examples that illustrate your points.
- Use suitable academic arguments that will explain your points.

Minimum Work: 3,000 Word Report.

Deadline: 10am Tuesday 8th May 2018.

Submission: Turnitin via TECH3501 Blackboard.

Marking & Feedback: 10am Thursday 7th June 2018.

16.4.2 Questions

Answer the following question:

Can community media development programmes improve a sense of civic, social or economic engagement and participation without compromising ethical standards?

16.4.3 Assessment

You will be assessed according to the extent that you answer this question using verifiable and objective evidence, use supporting academic arguments and observations taken from the recommended module reading resources, and are able to organise this information in a clear and logical progression, according to academic report writing conventions. While guidance and tips for effective report writing will be given in the lectures and the workshop sessions, this assignment depends on a high level of independent work and the use of initiative to research the topic, to undertake the appropriate reading, and to manage the process of compiling and writing your report.

You will have the opportunity to discuss effective techniques for investigation, research and report writing with your tutors. You will be expected to make notes at these sessions, and to bring with you any planning notes that you are developing in preparation for producing your report.

Online resources and guides to effective academic study will be signposted throughout the lecture and workshop sessions, and will be included in the notes that accompany these sessions. It is each learner's responsibility to collate and assimilate these notes, and thereby demonstrate that you are capable of independent planning, research, organisation and writing.

16.4.4 Report Formatting

This is a report, and not an essay, so the structure and the layout of the document should be formatted in the appropriate manner, with:

- A title page.
- A contents page.

- A list of figures.
- A list of tables.
- Numbered sections.
- A bibliography

Reports are written and presented in structured sections, with objective and verifiable evidence and examples. Citations and references are therefore essential. The Harvard or APA citation system must be used, and the use of citation management systems are encouraged. There are many standard guides available online, more will be flagged in the lecture and workshop sessions.

16.4.5 Presenting an Academic Argument and Discussion

There is lots of online advice available about the practice of writing academic reports. Further resources will be flagged in the lecture and workshop sessions, and you will have an opportunity to discuss these issues with your tutors.

This is a guide from the University of Southern California that is useful, and illustrates the international set of expectations that you are engaging in a learning activity that is recognised around the world as a standard set of learning skills.

The purpose of the discussion is to interpret and describe the significance of your findings in light of what was already known about the research problem being investigated, and to explain any new understanding or insights about the problem after you've taken the findings into consideration. The discussion will always connect to the introduction by way of the research questions or hypotheses you posed and the literature you reviewed, but it does not simply repeat or rearrange the introduction; the discussion should always explain how your study has moved the reader's understanding of the research problem forward from where you left them at the end of the introduction.

1. Most effectively demonstrates your ability as a researcher to think critically about an issue, to develop creative solutions to problems based upon a logical synthesis of the findings, and to formulate a deeper, more profound understanding of the research problem under investigation.
2. Present the underlying meaning of your research, note possible implications in other areas of study, and explore possible improvements that can be made in order to further develop the concerns of your research.
3. Highlight the importance of your study and how it may be able to contribute to and/or help fill existing gaps in the field. If appropriate, the discussion section is also where you state how the findings from your study revealed new gaps in the literature that had not been previously exposed or adequately described.
4. Engage the reader in thinking critically about issues based upon an evidence-based interpretation of findings; it is not governed strictly by objective reporting of information.

<http://libguides.usc.edu/writingguide/discussion>

TECH3501 Coursework D Assessment Criteria:

	Report Format	Report Structure	Evidence	Academic Context	Writing	Evaluation
0 – 20%	<ul style="list-style-type: none"> Does not use report writing conventions or format. No use of built-in formatting tools. Contains obvious errors and poor use of language. No consistency in report structure and organisation. 	<ul style="list-style-type: none"> Has no logical progression and is not subdivided into clear sections. Evidence and observations are limited and presented haphazardly. There are no illustrations, diagrams or tables. 	<ul style="list-style-type: none"> There is no or severely limited evidence provided. Evidence is entirely subjective or first-hand. Evidence is not cited or accounted for. Evidence is contradictory or inconsistent. 	<ul style="list-style-type: none"> The points made are not related to any academic reading or discussions. There is no use of academic terms or concepts. There is no consideration for wider academic debates. 	<ul style="list-style-type: none"> Writing style is poor and contains many errors. There is little attention to detail, punctuation, syntax. Colloquial or slang terms are used through the report. 	<ul style="list-style-type: none"> No sense of evaluation or consideration of alternative ideas. There are no techniques of analysis applied. Comments and observations are superficial and cursory.
20 – 40%	<ul style="list-style-type: none"> Basic and poor report formatting. Limited use of built-in formatting tools. Contains some errors with poor use of language. Largely inconsistent structure and organisation. 	<ul style="list-style-type: none"> Has some logical progression between sections, but is not clear or lacks appropriate division. Evidence and observations are limited and aren't clearly connected. The use of images, diagrams and tables is limited. 	<ul style="list-style-type: none"> Evidence is limited and unclear. Evidence is largely subjective or first-hand. Evidence is cited or accounted for poorly. Evidence is general or has inconsistencies. 	<ul style="list-style-type: none"> Points made are vague and only generally related to academic reading or discussion. Use of academic terms and concepts is unclear and general. There is only little consideration of wider academic debates. 	<ul style="list-style-type: none"> Writing style is inconsistent and contains some errors. There are repeated errors in punctuation, detail and syntax. Phrasing can be informal and colloquial. 	<ul style="list-style-type: none"> Limited sense of evaluation with little consideration of alternative ideas. The analysis techniques used are basic and poorly applied. Comments and observations are inconsistent and limited in scope.
40 – 60%	<ul style="list-style-type: none"> Clear use of report format and structure. Some use of built-in formatting tools. Contains small number of errors, with competent use of report structure format. Consistent organisation and general progression between report sections. 	<ul style="list-style-type: none"> There is logical progression between sections and each is subdivided and identified clearly. Evidence and observations are clearly identified and are appropriately structured. The use of images, diagrams and tables is clear. 	<ul style="list-style-type: none"> Evidence is proficiently accounted for and identified. Evidence is drawn mainly from objective and authoritative sources. Evidence is accounted for but has inconsistencies in the citations. Evidence is clear and appropriate to the topic. 	<ul style="list-style-type: none"> Points made are clear and relate in general to the academic reading and discussion. Use of academic terms is clear and specific to topics discussed. There is some consideration of the related wider academic debates. 	<ul style="list-style-type: none"> Writing style is consistent and contains only minor errors. The syntax and punctuation are consistent and there is a good attention to details. Phrasing is formal and suited to academic writing. 	<ul style="list-style-type: none"> General sense of consistency in the evaluation with broad consideration given to alternative ideas. Analysis techniques are general and consistently applied. Comments and observations are well founded and relevant.
60 – 80%	<ul style="list-style-type: none"> Detailed use of report format and structure. Extensive use of built-in formatting tools. No obvious errors, and detailed report structure. Clear organisation with logical progression between report sections. 	<ul style="list-style-type: none"> The progression between sections is effective and clearly subdivided. Evidence and observations are well mapped and identified. The use of images, diagrams and tables is effective. 	<ul style="list-style-type: none"> Evidence is accounted for and identified clearly and appropriately. Evidence is drawn entirely from objective and authoritative sources. Evidence is clearly cited and accounted for. Evidence relates specifically to the topic. 	<ul style="list-style-type: none"> Points are specific and well supported in the academic reading and discussion. The use of academic terms are detailed and thorough. There is specific consideration to the related wider academic debates. 	<ul style="list-style-type: none"> Writing style is consistent and imaginative and is free from errors. The syntax and punctuation are sophisticated and there is strong attention to detail. The phrasing is academically informed and suited to an informed audience. 	<ul style="list-style-type: none"> A clear sense of consistency in the way that alternative ideas are considered. The analysis techniques that are used are well applied and insightful. The comments and observations are illustrative, relevant and move the debate forward.
80 – 100%	<ul style="list-style-type: none"> Sophisticated use of report format and structure. Extensive and detailed use of built-in formatting tools. No errors and rich use of report structure. Consistent organisation with rich progression between report sections. 	<ul style="list-style-type: none"> The progression between sections is innovative and clear. Evidence and observations are effectively mapped and identified. The use of images, diagrams and tables is innovative. 	<ul style="list-style-type: none"> Innovative and imaginative use of source material for evidence. No assumptions are made, and each source is interrogated thoroughly. Based on clear and direct examples that relate to the topic. 	<ul style="list-style-type: none"> The points are direct and well suited to the arguments and discussions in the reading material. The use of academic terms is thorough and in-depth. References to academic discussion explore the wider issues of concern. 	<ul style="list-style-type: none"> Writing style is inventive and creative and enthralls the reader. The syntax and punctuation are sophisticated and the detail is complex. The phrasing is clearly academic and suited to an expert audience. 	<ul style="list-style-type: none"> Strong sense of consistency in the way that ideas are assessed and considered. The analysis techniques are insightful, make original contributions. The comments and observations move the debate forward.

17 Coursework Notes:

- All written work should demonstrate evidence of engagement with the module curriculum such as through reading and research and the use of appropriate academic conventions of presentation such as the use of references and bibliography. Consult the module handbook for further details.
- As a general guideline, each blog post should be in the region of 300-500 words.
- The minimum requirement is a weekly post, but greater frequency is encouraged.
- The blog posts should make use of the affordances of blogging such as hypertext links, tagging and embedded media.
- When writing the blog posts, think about:
 - What is the topic area? (introduce it to your reader clearly)
 - Why does this topic area matter?
 - Why does this topic area matter to you? (give an example)
 - Why does this topic area matter to the media or wider field of life in general? (give an example)
 - Can you make connections to other areas of life/media?
- Do you have any arguments or conclusions about this topic that might be of value to others interested in this topic or issues?

18 Late Submission

Late submission of coursework will be processed in accordance with current University regulations which state “the time period during which a student may submit a piece of work late without authorisation and have the work capped at 40% if passed is 14 calendar days. Work submitted unauthorised more than 14 calendar days after the original submission date will receive a mark of 0%.

These regulations apply to a student’s first attempt at coursework. Work submitted late without authorisation which constitutes reassessment of a previously failed piece of coursework will always receive a mark of 0%.

For information, the required undergraduate University regulation can be found at:

<http://www.dmu.ac.uk/documents/about-dmu-documents/quality-management-and-policy/academic-quality/scheme-regulations/undergraduate-regulations.pdf>

19 Resits & Reassessment:

Should you fail this module you will have the opportunity to undertake a resit of the component that you failed.

- The coursework can be passed as an average; though should you not meet the 40% pass mark you may need to resit the component that you failed. The only opportunity you will have to resit the coursework necessary component will be during the summer of 2017. There will be no coursework ‘catch-up’ opportunities during the year.
- Students who fail the module will be contacted by the Faculty of Technology Office and will be asked to register for a resit attempt. This information will be sent to students in June 2017.
- The resit-coursework will be completed as described in this handbook, though students are advised to email the module tutor when they have submitted their wiki entries with a link to the page that specifies the required blogs, wiki posts or presentation.

20 DMU Commons Wordpress Blog

Your blog should be created using Wordpress on the DMU Commons or 'Our DMU'
<https://our.dmu.ac.uk/>

This is a blogging platform and social network that link together staff and students from across De Montfort University into one online community.

Your usual DMU login username and password should work on the DMU Commons. For further help, see the 'About' and 'Help' tabs on the Commons. The 'Building Your Site' page is particularly helpful

(<https://our.dmu.ac.uk/administration/building-your-site/>).

21 General Module Assessment Criteria

Mark range	
90-100%	<p>Responds to all of the assessment criteria set for the task</p> <p>Displays exceptional degree of originality</p> <p>Exceptional analytical, problem-solving and/or creative skills</p> <p>No fault can be found with the use of sources or referencing other than minor errors such as typographical issues</p>
80-89%	<p>Responds to all of the assessment criteria set for the task</p> <p>Work of outstanding quality, evidenced by an ability to engage critically and analytically with source material</p> <p>Likely to exhibit independent lines of argument, used of media and concept production</p> <p>Highly original and/or creative responses</p> <p>Extremely wide range of relevant well-referenced sources used where appropriate</p>
70-79%	<p>Responds to all of the assessment criteria set for the task</p> <p>An extremely well developed response showing clear knowledge of media technology and the ability to interpret and/or apply that knowledge</p> <p>An authoritative grasp of the media technology subject with significant originality and insight</p> <p>Significant evidence of ability to sustain an argument, to think analytically, critically and/or creatively and to synthesize material</p> <p>Evidence of extensive study, appropriate to the task and high standards of referenced sources</p>
60-69%	<p>Responds to most of the assessment criteria set for the task</p> <p>An detailed response demonstrating a thorough grasp of theory, understanding concepts, principles, methodology and media technology content</p> <p>Clear evidence of insight and critical judgement in selecting, ordering and analysing content</p> <p>Demonstrates ability to be able to synthesize material, to construct responses and demonstrate creative skills which reveal insight and may offer some originality</p> <p>Draws on an appropriate range of properly referenced sources</p>
50-59%	<p>Responds to most of the assessment criteria set for the task</p> <p>An effective response demonstrating evidence of a clear grasp of relevant material, principles and key concepts</p> <p>An ability to construct and organize arguments</p> <p>Some degree of critical analysis, insight and creativity</p> <p>Demonstrates some conceptual ability, critical analysis and a degree of insight</p> <p>Accurate, clearly written/presented work</p>
40-49%	<p>Responds to some of the assessment criteria</p> <p>A response demonstrating an understanding of basic points and principles about media technology to show that some of the learning outcomes/assessment criteria have been achieved at a basic level</p> <p>Suitably organized work showing a reasonable level of understanding</p> <p>Covers the basic subject matter of media technology and is appropriately presented but is rather too derivative and insufficiently analytical</p> <p>Demonstrates limited conceptual ability, levels of evaluation and demonstration of creative skills</p> <p>Demonstrates adherence to the referencing conventions appropriate to the subject and/or task</p>
30-39%	<p>Overall insufficient response to the assessment criteria</p> <p>A weak response, which, while addressing some elements of the task, contains significant gaps and inaccuracies</p> <p>Indicates an answer that shows only weakly developed elements of understanding of media technology and/or critical thinking or academic skills</p> <p>May contain weaknesses in presentation that constitute a significant obstacle in communicating knowledge and ideas</p>
20-29%	<p>Overall insufficient response to the assessment criteria</p> <p>A poor response, which falls substantially short of achieving the learning outcomes</p> <p>Demonstrates little media technology knowledge and/or critical thinking or academic skills</p> <p>Little evidence of argument and/or coherent use of material</p>
10-19%	<p>Overall insufficient response to the assessment criteria</p> <p>A very poor response demonstrating few facts about media technology</p> <p>Displays only isolated or no media technology knowledge and/or critical thinking or academic skills</p> <p>Little adherence to the task set</p>
0-9%	<p>Overall insufficient response to the assessment criteria</p> <p>Displays virtually no media technology knowledge and/or critical thinking or academic skills</p> <p>Work is inappropriate to the assessment task given</p>

22 Presentation of Written Assignments and Harvard Referencing

All written work (including electronic text such as blog posts) must satisfy basic requirements:

- Spelling, punctuation and grammar should be accurate.
- Proper use should be made of bibliographies and references.
- Evidence of reading and research is essential.

Good assignments are likely to demonstrate:

- The ability to organise a relevant response to the type and terms of the assignment set.
- The ability to evaluate and critically analyse material, to provide evidence of wide reading, and to display some personal insight.
- The ability to present evidence, construct arguments and draw conclusions.

22.1 Presentation

Lengthy quotations (over two lines) should be indented (block quoted) further than for a paragraph. Italicise titles of novels, films, plays, television programmes, computer games, magazines and art works, and so on. Thus: *Jaws*, *The Royle Family*, *Tomb Raider*, *Empire*. You can also add further information, such as year of production or 'authors' of films, videos and television programmes consulted, by listing Title (director and date), for instance, *Taxi Driver* (Martin Scorsese, 1976). Enclose in quotation marks the titles of journal articles, articles in newspapers and magazines, essays and chapters in books, songs, lectures and episodes of television programmes. Thus: 'I Can't Get You Out of My Head'.

If you refer to visual material (photographs, pictures, stills, etc) try to include it with the text. Acknowledge all the published material you have consulted in the preparation of the assignment using the Harvard reference system.

22.2 Bibliography and References

Each time a quotation, paraphrase or another direct reference to published material (including films, television programmes, websites, etc) is made, it should be referenced. References and bibliographies require a referencing system. There are many systems available, but the Harvard system is simple and used widely.

22.3 Harvard System for Referencing

What is referencing? Referencing is a standardised way of acknowledging the sources of information and ideas that you have used in your assignment. Referencing is necessary to avoid plagiarism, the use of other people's work as your own. It also shows the reader where they can find the information to which you have been citing and referring. The ability to use a reference system is a basic requirement of scholarly activity.

There are many acceptable forms of referencing and different styles. The key point is that whatever system or style that you use it must be used consistently throughout the document. The advice for this module is to use the style and system adopted in the DMU Library publication on the Harvard system (<http://www.library.dmu.ac.uk/Images/Selfstudy/Harvard.pdf>).
